National Milk Records (NMR)

National Milk Records (NMR) is the leading supplier of milk recording services in the UK, providing management information on individual cow's performance in terms of milk quality, yield and fertility.

From its formation in 1943, NMR has grown and developed into an integrated service provider working for farmers as well as an independent source of data for advisors such as vets, farm consultants and breed societies.

Meet Helen Whitaker and the NMR team every fourth Thursday at Gisburn Auction Mart. Next date: 28 September 2017

Working progress

This page is currently under construction with traders' details being added all the time.

If you have an agricultural-related business and would like to know more about how working with Gisburn Auction can benefit you then give us a call.

DALEHEAD VETERINARY GROUP- Thursday from 10.30am to 1pm.

Anne Carr works down at the office and is the Practice Dispensary Manager and Farm Coordinator.

Anne is an AMTRA qualified SQP for farm animals, and a friendly face well known in the local community. The kettle's always on if anyone pops in with a query or for a chat.

Delivery of ordered prescriptions can be arranged for busy farmers to pick up while they are at the auction.
